DIGITEL Corporation announces the launch of FreedomPipe Business-Class Hosted IP Telephone Service

*FreedomPipe Business Class Hosted IP Telephone Services
now available in Atlanta, GA*

Atlanta, GA (March 1, 2007) – DIGITEL Corporation is a leading provider of integrated voice and data business communication solutions, today announced the launch of FreedomPipe Services in the Atlanta Georgia metropolitan area.

FreedomPipe is a powerful business communication solution that bundles Local and Long Distance telephone service, high-speed internet access and a suite of advanced IP telephony features and applications. This strategic product launch demonstrates Digitel's continued commitment to creating innovative solutions that provide small-to-medium businesses with competitively priced advanced communications products and services.

FreedomPipe is designed for small to mid sized business that rely on both Voice and Internet communications, FreedomPipe simplifies voice and data networks, increases employee efficiency, and reduces the overall cost of communications and ongoing maintenance – freeing you to manage your business, not your communication systems.

IMPRESSIVE CALL HANDLING, MESSAGING AND HIGH SPEED INTERNET

FreedomPipe offers sophisticated call routing, voicemail features and Unified Messaging. With standard features you'd expect from an enterprise class phone system, like caller ID, many ways to forward and transfer calls and personalized voicemail options along with advanced features like selective call control, Find-me/Follow-me call forwarding, voicemails sent to email, and the ability to connect multiple offices and remote workers together with multi-site dialing plans.

PERSONAL WEB-BASED CALL CONTROL

FreedomPipe allows employees to customize their telephone features and listen to voicemail by logging on to the web. The intuitive web based interface helps them use find-me/follow-me features, voicemail, call handling tools and much more.

LOWER COST OF OWNERSHIP

With FreedomPipe, you don't need a PBX or key system any longer. FreedomPipe's hosted PBX system delivers world class PBX features to business subscribers over a managed T-1 broadband connection, providing a robust set of calling features traditionally only available to large enterprises. Our hosted PBX eliminates the need to purchase or lease a PBX or key system - saving capital, floor space, electricity and insurance requirements of a premise based system. And adding multiple locations and remote employees doesn't cost a bundle. FreedomPipe service (and the cost) scales with your business – from SOHO to Enterprise.

FreedomPipe is the only carrier grade hosted IP Telephone service that combines managed broadband access with a professionally hosted and managed IP Telephone System as well as complete turnkey installation of local area networking and IP telephone installation offering end to end implementation.

About Digitel

DIGITEL Corporation was founded in 1983 in Atlanta, Georgia to provide telecommunications systems design, sales, installation, and services for small to mid market business customers. By assembling a team of talented professionals with extensive experience in telecommunications software, hardware and data networking solutions, as well as selective acquisitions, DIGITEL has grown to serve over 10,000 business customers in nine markets primarily in the Southeastern United States and over 215,000 Internet and E-Mail subscribers.

Over the years, as communications technology has advanced and the convergence of voice and data has become commonplace in today's business environment, DIGITEL is

focused on providing next generation technology in the converged communications solutions marketplace. Digitel Corporation offers solutions to meet the growing needs of customers whose communication infrastructure is critical to their business. Using both our internal resources and those of our technology and network partners, we offer fully converged communication solutions to our clients – from traditional telephone systems to professionally hosted and managed IP solutions. As a leader in enhanced communication technology, DIGITEL delivers reliable, next generation solutions to ensure our client's competitive edge in their industry.

FreedomPipe Voice over IP services can be ordered directly by calling 770.451.1111. For more information on Digitel's FreedomPipe Voice over IP services, visit our website: <http://www.freedompipe.com>.
