

Digitel Completes WIMAX 2.5 EBS Design for Auburn Broadband Turnkey Feasibility Design, Build, and Business Planning Solution

FOR IMMEDIATE RELEASE -- ATLANTA, GA--(PRT Newsfeed – October 22, 2008) Digitel Wireless, a Digitel company, announced today that it has completed and delivered a turnkey mobile WIMAX 2.5 Ghz, preliminary design solution for Auburn Broadband, LLC, an Atlanta based wireless company.

Digitel Wireless provided a complete turnkey consulting solution that included a technology assessment, preliminary site selection, vendor comparison, and 2.5 GHz WIMAX licensed spectrum design utilizing Marconi's Planet EV, the standard for WiMax design. Also provided was a detailed business plan considering population and household data that provided a financial and operations model that considers the latest technology improvements of the WiMAX forum and various vendors. A detailed competitive analysis was also included.

Richard Kolsby, CEO of Auburn Broadband stated that "I could not have been more pleased with Digitel's turnkey deliverable. It is one of the most thorough designs I have seen in a long time." Kolsby went on to say that "this will help Auburn Broadband ensure the best WiMAX design possible enabling us to reach the maximum number of businesses and residences with mobile high speed (2 Mb/s to 20 Mb/s) and high quality wireless broadband products and services. John Overley, VP and GM of Digitel Wireless echoed Kolsby's comments by saying, "We were glad to hear Richard was satisfied with our design and business plan". Overley went on to say "Digitel Wireless is fortunate to have a skilled team of engineers that we think are the best in the industry." Overley finished by saying, "when it comes to IP Network and RF engineering, there is no better team."

About Digitel and Digitel Wireless

Digitel Wireless - a Digitel company, was formed to deliver state of the art broadband and wireless infrastructure equipment and consulting services for the rapidly expanding wireless broadband Rural and Metro Municipal markets. Digital Wireless brings a combined 50 years of experience in the delivery of professional IT services for Voice, Data, and Wireless infrastructure & related services through its partners or through resources available from other divisions of the Digitel Corporation. www.digitel.net

About Auburn Broadband, LLC

Richard Kolsby has a long and successful track record in starting and building leading edge technology companies and he founded Auburn Broadband, LLC in 2006. In the Fiber Optic Network build outs in the 1980's and CLEC build outs during the 1990's, Kolsby started four successful companies that sold for large multiples. Auburn Broadband holds 67.5 MHz of FCC licensed spectrum in the 2.5 GHz EBS band and plans to build a WiMax broadband network in Auburn and Opelika, Alabama, as well as in other smaller rural markets in the surrounding coverage area. Service offerings will include mobile wireless high speed internet access (up to 20 mb/s) for small business, residents, educational institutions and municipalities. VoIP voice telephone service and IP video service are also planned at discounted prices.
