

DIGITEL is Transforming the Way Companies Communicate

A Rich History of Service and Innovation

DIGITEL Corporation was founded in 1983 in Atlanta, Georgia to provide telecommunications systems design, sales, installation, and services for the small to mid market business customers. By assembling a team of talented professionals with extensive experience in telecommunications software, hardware and data networking solutions, as well as selective acquisitions, DIGITEL has grown to serve over 10,000 business customers in nine markets primarily in the Southeastern United States and over 165,000 Internet and E-Mail subscribers.

Over the years, as communications technology has advanced and the convergence of voice and data has become commonplace in today's business environment, DIGITEL is focused on providing next generation technology in the converged communications solutions marketplace. We offer solutions to meet the growing needs of customers whose communication infrastructure is critical to their business. Using both our internal resources and those of our technology and network partners, we offer fully converged communication solutions to our clients – from traditional telephone systems to professionally hosted and managed IP solutions. As a leader in enhanced communication technology, DIGITEL delivers reliable, next generation solutions to ensure our client's competitive edge in their industry.

Experience, Knowledge and Service Beyond Expectations

The experience, knowledge, the quality of our services, our relationships with our business partners and our focus on providing a personal and professional level of service are the ingredients that have made DIGITEL successful since its inception.

Over the years, DIGITEL has made several strategic acquisitions that have allowed us to enhance the services we provide to our clients. In 1998, DIGITEL acquired Nortel Information Networks, the ISP division of Nortel Networks. DIGITEL renamed the company Neo Nova Network Services. Today, NeoNova provides wholesale Internet Services to Independent Telephone Companies and selected Cable Companies, as well as business internet services to DIGITEL's clients. Today through its' world class Telco Grade Data Center and customized Internet Tool Sets in Raleigh, NC, NeoNova provides Internet Services, e-mail, spam and virus filtering, parental controls and advanced applications to over 165,000 customers across the United States.

The founding partners, management and technical team of DIGITEL have a strong track record and extensive experience in developing and successfully managing the deployment of the latest technologies and applications to serve the needs of the most discriminating companies..

At DIGITEL, for over 25 years, we have been developing and deploying next generation communication solutions that allow our clients to connect, communicate and stay ahead of their competition.

Wireless Solutions

DIGITEL Makes the Difference

CEOs, CTOs and CFOs turn to DIGITEL's 25 years experience delivering complete business class communication solutions. Our talented technical staff has installed over 20,000 business communication systems. While our ISP subsidiary, NeoNova Network Services serves over 250,000 Internet and E-Mail Subscribers. Together, we *have the knowledge, experience and ability to design and deliver a communication solution custom tailored to your business needs.*

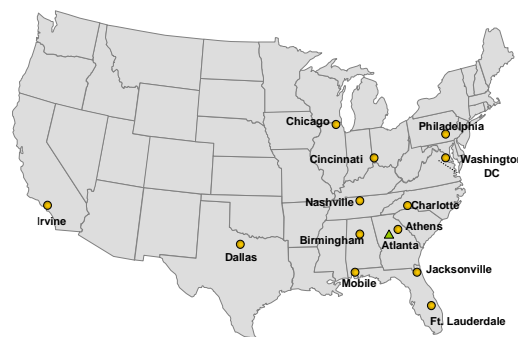

At DIGITEL, we understand that your business depends on its communications and choosing the right partner can be a difficult task. DIGITEL makes it easy. With expertise in delivering next generation technology solutions for small to mid sized businesses, we can deliver a solution that is tailored for your business.

DIGITEL Corporation offers a wide variety of voice and data solutions to meet the demands of any business. DIGITEL has the ability to design, integrate, and support complex communications infrastructures such as IP Telephony, Wireless, LAN/WAN, VPN Solutions, Unified Communications, and Multimedia Contact Centers.

A Trusted Partner

In an age when customer service is on the decline, DIGITEL continues to provide superior service beyond the sale. Just as we did in our early days, we continue to grow our business with next generation technology and the unrivaled local service. DIGITEL has consistently been early to market with fresh communication solutions like Voice over IP. Our services now encompass a full range of premise based and hosted traditional and IP voice and data communication solutions.

DIGITEL Corporation Branch Offices

DIGITEL has partnered with best-in-class technology providers, some of the most well known and well-respected companies in the world. Digitel is a Cisco Premier Certified Partner — your guarantee that our equipment and services conform to the highest standards of quality and performance. Whether a premise based solution from Cisco Systems, NEC and Nortel Networks; or a professionally hosted and fully managed FreedomPipe solution, our consultants can offer the solution that's right for your business.
